Ref: certificate of quality

LITERAL TRANSLATION OF "CE" QUALITY CERTIFICATE 94/62 OF THE EUROPEAN COMMUNITY

We certify that the polypropylene homopolymer material which we manufacture BIOLOGIA y FILTRATION S-L., consists of parts and waste from other injections.

These are materials that do not carry mineral charges such as talc, microspheres and fiberglass, or other additives such as oils or lubricants.

To comply with the Official Regulations of the European Community, WE EXPOSE That: Both the material we originally use and the manufacturing process of the polypropylene that we manufacture for you, does not contain or incorporate any of the heavy metals mentioned in the "EEC"

Therefore, we can CERTIFY that the polypropylene we serve is in accordance with the regulations referred to in the EEC 94/62 directive, relating to packaging and their waste.

For the record at the request of interested parties, we have issued this certification on June 2, 2016
